Profile

I'm a Computer Science student with an interest in Java, web development, and Frontend. I enjoy building practical projects and taking initiative in leadership roles, especially through IEEE WIE. I'm passionate about innovation and encouraging more women to explore opportunities in technology.

Work Experience

Frontend Developer

Nov 2025 – Present

Saukhyam Foundation, India

- Working on the CARE project, focusing on frontend development and implementing responsive user interfaces.
- Designed UI for a healthcare-focused application addressing PCOS/PCOD concerns.

Chair – Women in Engineering (WIE)

Jan 2024 – Jan 2025

Tula's Institute, Dehradun, Uttarakhand

- Organized 15+ technical events including Utkrisht, WiSe Council Inauguration, and IEEE ICACCM International Conference.
- Managed logistics, budgeting (\$1600), and speaker coordination for hybrid national and international events.
- Led cross-functional teams and handled documentation and participant outreach.

Projects

Employee Management System (Group Project) | React.js, Node.js, Express.js, MySQL | Live Demo

- Collaborated in a team to develop a full-stack Employee Management System to manage employee records, roles, attendance, and payroll details.
- Built responsive frontend interfaces using React.js for employee registration, updates, and dashboard analytics.
- Developed RESTful APIs using Node.js and Express.js for CRUD operations and secure data handling.
- Integrated MySQL database to store and manage structured employee data efficiently.

Library Attendance System | React.js, Node.js, Express.js, MySQL | GitHub

- Built a digital attendance management system to streamline library operations.
- Designed dashboard interface with student record access and Excel export functionality.
- Implemented real-time attendance tracking and optimized data retrieval for efficient record management.

Research & Publications

Neural Networks for Smart Augmented Reality Interfaces in Human-Computer Interaction | IEEE

- Designed AR-based patient monitoring framework integrating IoT sensors and LSTM models.
- Achieved 92% detection accuracy and 85% faster response time using real-time visualization.

Multi-Objective Optimization of Reinforced Concrete Buildings using NSGA-II | IEEE

- Implemented NSGA-II for optimizing reliability, cost, and failure probability in RC structures.
- Analyzed Pareto-optimal fronts to evaluate trade-offs using regression-based cost prediction models.

Education

B.Tech in Computer Science and Engineering

Expected June 2026

Tula's Institute of Engineering and Management, Dehradun

CGPA: 7.1/10.0

- Awards: 1st Runner-Up (3D Printing), 2nd Runner-Up (Ideathon).

Technical Skills

Languages & Frontend: Java, HTML, CSS, JavaScript, React.js

Backend & Frameworks: Node.js, Express.js

Databases: MySQL

Tools: Git, GitHub, VS Code, Vercel, Figma
